Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-39 are rejected under 35 U.S.C. 102(a) as being anticipated by Solar 7000/8000 Patient Monitor Operator's Manual.

The above teaches all of the claimed subject matter.

3. Claims 1-7,20 are rejected under 35 U.S.C. 102(b) as being anticipated by Wang et al '917.

Wang teaches the ability to determine and display both a patient's ECG and non-invasively determined cardiac output, see column 7, lines 50-67. Also, see column 5, lines 41-47 regarding the use of two pairs of electrodes.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 8-13,21-27,31-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maschke et al in '012 view of Wang et al '917.

Maschke teaches all of the subject matter of the above claims except the determination and display of non-invasively determined cardiac output. As described above, Wang teaches such a feature in a device that also displays a patient's ECG. It would have been obvious to add such a feature to the device of Maschke in order to make cardiac output determination less demanding on the operator, see column 1, line 59 to column 2, line 7.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott M. Getzow whose telephone number is (703) 308-2997. The examiner can normally be reached on M-F, 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Angela D. Sykes can be reached on (703) 308-5181. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0858.
